Forecast for Wednesday 26 May 2021

Weather: Showers will move southwards through the region overnight, by mid-morning it will be dry and cloud will break up to leave a largely sunny day across the whole region. Overnight some patches of fog and mist will form in valleys, elsewhere though it will remain dry and clear.

Chance of cloud free mountain/hill tops above 600m: 40% becoming 100% by mid-morning morning

Visibility: Initially good but deteriorating in and around any showers and as cloud bases of around 400m cover hill tops. Improving by mid-morning to be very good through the whole day as cloud bases lift above summits. Becoming poor after dusk in valleys in any fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Once the morning gets underway and cloud breaks up it will be a sunny day on the hills with high UV. The north-westerly breeze will bring a chill to the air on hill tops though.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 25 May 2021	0.2mm	21.4mm	28.8mm

Forecast for Thursday 27 May 2021

Weather: A dry and bright day across the whole region with high UV levels. There will be fog in valleys first thing, though this will clear quickly once the sun comes up.

Maximum wind: South-westerly 8mph gusts of 16mph.

Chance of cloud free mountain/hill tops above 600m: 100%

Visibility: Excellent throughout the day, though poor in valleys first thing in any fog patches.

Temperature: **Valleys:** Plus 8 Celsius becoming Plus 15 Celsius.
At 600m: Plus 4 Celsius becoming Plus 11 Celsius.
Freezing level: Above the summits
